

Do you have Management Experience in the Food, Beverage & Construction industries and LOOKING FOR A LIFESTYLE CHANGE?

If this role is right for you, you'll be looking for a position where you can apply your management experience in the mechanical and welding industry, as well as your customer service skills and combine your natural desire to have fun in serving the people you come into contact with and at the same time enjoying the lifestyle and activities that the **Albury Wodonga Region** has to offer.

RMR Engineering is an extremely busy regional based family / Australian owned and operated business. We are currently seeking a qualified and experienced **Manufacturing Supervisor / Manager (Workshop Supervisor / Manager)** to join our expanding team. We have a fantastic close-knit team of highly motivated people and are looking for the person who will lead and inspire them...

To be considered for this position you need to be able to pick up the ball and run with it! We want someone who can look at a job and know exactly what the outcomes are, know exactly what you need to do to get the job done, and be resourceful enough to get what you need and do the job right the first time! If you're the right person for this job, you never see problems you only see opportunities!

To be successful in this role you need to be:

- Have a '**No Compromise**' attitude towards Safety.
- Management experience in a 'Jobbing' environment with medium / large teams.
- Strong focus on costing and financial cost management.
- Possess a high level of personal responsibility / be super organised.
- Passionate about providing a 'Great Customer Experience'.
- Have an eye for detail and apply attention to detail in everything you do.
- Love a challenge and can think on your feet.
- A positive attitude, team player and a great communicator.

You will have been very active in this type of work before and love not just the so-called fun parts of 'fabricating and providing solutions', but also ensuring the systems are diligently followed, including paperwork, systems utilisation, housekeeping and maintaining a clean and safe environment.

Personal drive is something that comes naturally and you'll be someone who can quickly assess the situation and come up with several approaches to a problem (opportunity). You'll be a good judge of people and know how to present your ideas to different people to get the best outcome.

Our business can be crazy busy and that means that you will be too. So, you will need to think for yourself, notice things that need doing and just get them done. Oh, and one last thing before you apply, the right person for this job will truly understand the difference between a 9-5 job and doing whatever it takes to get the job done...

If you are seeking a career and / or lifestyle change in the picturesque foothills of the Murray Valley Region and this looks like the right position for you, if you feel you would love doing it and can see the career potential that your experience can bring for yourself and to our business, then please send us your resume and a covering letter addressing the key points above to Glenn Baker (**RMR Engineering** - Operations Manager) g.baker@rmrengineering.com.au / 0417 717 895

We are really looking for a dedicated and committed **Manufacturing Supervisor / Manager** who can get things done...
